SATISFYING CONSUMPTION: TRADE AND THE ENVIRONMENT

Consumption and trade continue to increase, creating unprecedented environmental challenges. The controversial Transatlantic Trade and Investment Partnership (TTIP) currently being negotiated behind closed doors threatens to hand more power to corporations and lower regulatory standards between the EU and the US, at untold environmental cost. As we enter a new era of trade, do we know the full implications of our actions?

Engage with leading practitioners, academics and environmental activists. Have your say in critical debate, enjoy our evening drinks reception, and take advantage of fantastic networking opportunities.
